

Mehdi Moradzadeh

Full-Stack Software Engineer

Toronto, ON | +1 416-858-1606 | mehdimoradzadeh@outlook.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-stack software engineer with 3+ years of experience (including FinTech consulting) specializing in Java Spring Boot and TypeScript ecosystems. Expert in architecting microservices and Next.js applications, implementing robust security with Spring Security/JWT, and automating GCP-based CI/CD pipelines. Leveraging a Master of Applied Science background to solve complex architectural challenges with analytical precision.

SKILLS & CERTIFICATIONS

Languages:	Java, JavaScript (ES6+), TypeScript, Python, SQL (MySQL)
Backend:	Spring Boot, Spring Security (JWT/BCrypt), JPA, Lombok, Maven, Node.js, Express.js, Flyway, RESTful APIs
Frontend	React, Next.js, React Native, Material UI, Tailwind CSS, Axios, React Router, Redux
Testing:	JUnit 5, Mockito, AssertJ, Postman, Playwright
DevOps & Cloud:	Docker, Kubernetes (GKE), GCP, Cloud Run, GitLab CI/CD, H2 Database, GitHub

WORK EXPERIENCE

FDM Group | FinTech

Toronto, ON

Software Engineer II

August 2025 – Present

- **Developed** a modular **React** admin dashboard with **Axios** for asynchronous API integration, featuring client-side route guarding and dynamic forms to streamline **CRUD** operations.
- **Automated** comprehensive end-to-end testing suites using **Playwright**, increasing frontend test coverage by 40% and ensuring seamless user workflows across multiple browser engines.
- **Engineered** administrative management modules using **Java Spring Boot**, implementing advanced user querying and data modeling to ensure high-performance, consistent service outputs.
- **Architected** relational data structures utilizing **JPA Repository** for custom query logic and managed schema versioning through **Flyway** to maintain data integrity across environments.
- **Strengthened** system security by implementing **Spring Security** filters, **JWT** for stateless sessions, and **BCrypt** for password hashing, while enforcing granular **RBAC** and **CORS** port restrictions.
- **Orchestrated** containerized deployments via **Docker** and **GKE**, automating **CI/CD** pipelines with **GitLab** to trigger **Artifact Registry** builds for versioning and backtrack compatibility.
- **Managed** sensitive application variables and API keys using **Google Secret Manager**, ensuring secure and centralized configuration management for clustered microservices.

Mr. Beaver Inc. | Manufacturing

Vaughan, ON

Software Engineer

February 2023 – August 2025

- **Architected** and launched the company's primary web application using **Next.js** and **Tailwind CSS**, improving average page load time by **40%** through Server-Side Rendering (SSR).
- **Engineered** a bespoke internal employee management system using the **MERN** stack (MongoDB, Express, React, Node.js) to automate scheduling and payroll tracking.
- **Designed** backend logic to automate inventory tracking and financial operations, reducing manual workflows by **25%** via custom **RESTful API** endpoints.
- Designed and maintained **CI/CD** pipelines on **Heroku**, ensuring stable deployments after each release.
- **Integrated** OAuth2 authentication and **JWT** for secure session management, ensuring authorized access to sensitive internal company data.
- **Migrated** legacy paper-based operations to a modern **MySQL** architecture, digitalizing records and improving overall data consistency and retrieval speed.
- **Orchestrated** the full deployment lifecycle on **Heroku**, managing **CI/CD** pipelines to ensure stable, continuous releases for business-critical operations.

EDUCATION

University of Toronto

Toronto, ON

Full Stack Web Development Certificate

Toronto Metropolitan University

Toronto, ON

Master of Applied Science (MAsc) in Engineering

- Developed advanced analytical frameworks and research methodologies for complex system modeling.

CERTIFICATIONS & INTERESTS

Certifications: Google Cloud Innovator (Core Infrastructure)

Interests: Technology trends, chess, global cultures through travel.
